DURANGO SRT HELLCAT[®] /// This is a big, bold, aggressive muscle car that also happens to be a three-row SUV. There's a 6.2L Supercharged SRT Hellcat V8 engine under the hood, but it's more than just that. We made a powertrain combination that spins higher for more horsepower. We made it feel different and sound different with a new X-pipe exhaust and 102-mm (4-in) outlets. The transmission has been tuned to shift harder and rev match like a muscle car. The suspension has been completely retuned to take advantage of the near perfect 50/50 weight distribution.

SAFETY & SECURITY FEATURES

PARK-SENSE® REAR PARK ASSIST SYSTEM²⁴ /// When your vehicle is in Reverse, this standard system can sense nearby objects when moving at low speeds; if an imminent collision is detected, the system will provide a momentary, autonomous brake pulse. In certain circumstances, this system can help bring your vehicle to a stop.

RAIN BRAKE SUPPORT /// When your windshield wipers have been activated, this standard system pulses the brake pads closer to the spinning rotors, helping to keep the rotors and pads dry for greater control and operator security.

BLIND-SPOT MONITORING (BSM) WITH REAR CROSS-PATH DETECTION²⁴ /// With this available system, radar continually monitors rear vehicle blind-spot zones and will visually and audibly alert you when a vehicle is sensed in any of the zones. When your vehicle is in Reverse, rear sensors warn through a chime if cross traffic approaches the vehicle.

ADAPTIVE CRUISE CONTROL (ACC) WITH STOP²⁴ /// This available system helps maintain a driver-selected distance from the vehicle ahead; under certain traffic conditions, the system can bring the vehicle to a full stop without driver intervention.

FORWARD COLLISION WARNING (FCW) WITH ACTIVE BRAKING²⁴ /// With this available system, radar and camera technology combine to alert you when the system senses a potential frontal impact. If you're not able to respond quickly enough, the system will automatically engage the brakes, with the ability to bring the vehicle to a complete stop.

PARKVIEW® REAR BACK-UP CAMERA²⁴ /// This standard system displays an accurate visual reference, including dynamic grid lines, of what is behind your vehicle when it's in Reverse.

ELECTRONIC STABILITY CONTROL (ESC)²⁶ /// This standard system is designed to assist you in maintaining control of your vehicle during extreme steering manoeuvres. ESC²⁶ senses when a vehicle is starting to spin (oversteer) or plow (understeer) and attempts to correct the vehicle's course by automatically controlling the throttle and applying the brakes at individual wheels.

READY ALERT BRAKING (RAB) /// This standard system anticipates situations when you may initiate an emergency brake stop and uses the ESC²⁶ pump to precharge the brake system in order to decrease the time required for full brake application.

ALL-WHEEL DRIVE (AWD) /// Automatically detects wheel-slip and sends additional power to the wheel(s) with the most traction. Standard on all Durango models.

ANTILOCK BRAKE SYSTEM (ABS) /// Standard four-wheel antilock disc brakes sense and prevent wheel lockup, offering improved steering control under extreme braking and/or slippery conditions.

LANE DEPARTURE WARNING (LDW) WITH LANE KEEP ASSIST²⁴ /// This available system measures your position within lane boundaries. If it detects an unintentional lane drift, it will alert you and can correct the vehicle back into the lane.
